SUMMARY

B.Tech Computer Science (Data Science) graduate with hands-on experience driving actionable insights through **data analytics, predictive modeling, and visualization**. Proven ability to extract and clean datasets using SQL and Excel, perform regression analysis, and build interactive Power BI dashboards to track KPIs. Engineered complex machine learning pipelines for demand forecasting with strict temporal cross-validation. Seeking an entry-level Data Analyst role to translate raw data into strategic business value.

WORK EXPERIENCE

CodexIntern | Backend Intern | August 2025

- Developed and deployed two full-stack web applications (To-Do List and Book Catalog) over a 1-month intensive internship using **Node.js** and **Express.js**.
- Engineered RESTful APIs to handle core CRUD operations, dynamic routing, and database management, ensuring efficient backend data flow.

KEY PROJECTS

Tourism Demand Forecasting System | Python | Pandas | Scikit-learn | Catboost | Power BI | DAX | Streamlit

- Conducted **regression analysis** using a CatBoost pipeline to forecast tourism demand for 47 Japanese prefectures (2008–2026) based on 25+ features.
- Extracted, cleaned, and sorted datasets using **Excel** and **SQL**, establishing robust data pipelines from Japan Tourism Agency records and web-scraped weather data.
- Fixed 6 critical data-leakage issues: chronological train/val/test split, shifted rolling averages, and walk-forward target encoding. Final model: 107K RMSE on 2025–2026 test set.
- Deployed an interactive **Streamlit dashboard** tracking key performance indicators (**KPIs**) to effectively communicate predictive trends to **stakeholders**.
- Extended pipeline with a **Power BI dashboard** (star-schema, 10+ DAX measures); validated model accuracy by comparing offline models using historical blind forward forecasts.

AssessIQ – AI-Powered Assessment Platform | React | OpenRouter API | pdf.js | Vercel

- Architected a multi-role education platform (React) with four distinct interfaces — unified under role-based access control.
- Developing a robust backend architecture using **FastAPI** to manage user data routing, session handling, and efficient API integrations.
- Engineered **LLM API integration (OpenRouter)** and applied **prompt engineering for auto-generated content**, enabling the AI to instantly generate assessment questions for educators.
- Built a PDF question-bank parser using pdf.js to auto-populate exam content, with manual entry available for teacher edits and additions.
- Deployed application via **Vercel** for production access.

TECHNICAL SKILLS

Data & ML: Pandas, NumPy, Scikit-learn, XGBoost, CatBoost

BI & Visualization: Power BI, Excel

Languages: Python, JavaScript, Java

Databases: MySQL, MongoDB, SQL

Web Development: React, HTML/CSS, Tailwind CSS, State Management (LocalStorage), Node.js, Express.js

Tools: Git, GitHub, Jupyter Notebook, VS Code

CERTIFICATIONS

Deloitte – Data Analytics Virtual Experience Program

EY & Microsoft – AI Skills Passport Certification

Japanese Language Proficiency Test (JLPT) – N4

Java Programming - Udemy

EDUCATION

B.Tech CSE (Data Science), Future Institute of Engineering and Management, CGPA: 7.8/10 — 2026, Kolkata

Higher Secondary Education, The Assembly Of God Church School (CBSE), Percentage: 74.2% — 2022, Purulia

Secondary, The Assembly Of God Church School (CBSE), Percentage: 80% — 2020, Purulia

LANGUAGES

English | Hindi | Bengali | Japanese (JLPT N4)

ACTIVITIES & INTERESTS

- Core Committee Member – College Sports Club
- Participant – Smart India Hackathon (SIH 2024)
- Badminton (competitive), Fitness, Cooking
